

Wood Processing in Taranaki

July 2021

Economic value to our region

- Manufacturing – a big economic contributor
- Taking raw materials, adding value through further processing, selling higher value product
- Taranakipine
 - Purchases \$24 million of logs & timber
 - Sells \$65 million of finished products

- 195 staff - \$12 million in wages p.a.
- Another \$2 million on local support services

Continue to invest

Automation & IT

Solid timber products growth

1. Engineer timber, mass timber, offsite manufacturing
 - Low carbon emitting building material
 - Speed of building construction
2. Modified Radiata pine clear timber replacing old growth & tropical rainforest species

MANUFACTURED BY TARANAKIPINE

Mass Timber Project

- South Auckland townhouses
- 101 units
- Woodspan PLT ground floor, mid floor & roof
- 10 days from laying ground floor to roof on and weatherproof

MANUFACTURED BY TARANAKIPINE

Rainforests are DISAPPEARING

Every minute,
forest the size of **20** football fields
is cut down

TheWorldCounts

Future is Modified Wood – But What is it?

The modification of non durable woods for durability, stability and beauty of old growth timber
